

Self-fusing Weatherproofing Tape

Bulletin 7559565 Revision C Page 1 of 2

Part number	Description	Quantity
FT-TB	.030" x 1.5" x 15' Black	2 rolls per kit

Note: Each roll of tape will accommodate one jumper to feeder connection and two jumper to antenna connections.

When removing the weatherproofing from connections, take precautions to not cut through the jacket of the coaxial cable. If the jacket is cut, the rewinding should start at the point of the exposed copper outer conductor.

Installation Tips

- When applied, the tape must be above 32°F (0°C) to ensure adhesion. Keep tape warm by carrying in coat pockets.
- Stretch the tape only enough to provide a smooth wrap.
- Smooth each wrapped layer with your hands to ensure full adhesion.
- Do not pull the tape to tear it - always cut it. Pulled tape eventually unravels, decreasing protection.
- Ensure complete coverage of coupling transition.
- When wrapping tape, overlap the tape to two-third.

Tape overlap
